Implicit meta-and via concatenation, no space except around whole relations compositions, no parentheses via higher priority to meta-and, brackets when all possible adjacencies are specified between two vertices:
Tournament adjacency:

$\forall u, v, u \left[\overline{\mathbb{M}} \vee \overline{\mathbb{M}} \right] v.$

Tournament adjacency with maybe some colored edge also, who knows?:

$\forall u, v, u \left[\overline{\mathbb{M}} \vee \overline{\mathbb{M}} \right] v.$

Directed graph:

$\forall u, v, u \left[\overline{\mathbb{M}} \vee \overline{\mathbb{M}} \vee \overline{\mathbb{M}} \vee \overline{\mathbb{M}} \right] v.$

Oriented graph:

$\forall u, v, u \left[\overline{\mathbb{M}} \vee \overline{\mathbb{M}} \vee \overline{\mathbb{M}} \right] v.$

Prefix notation:

$\exists u, v, u \left[\overline{\mathbb{M}} \vee \overline{\mathbb{M}} \right] v.$

$\exists v, e, v \left[\overline{\mathbb{M}} \vee \overline{\mathbb{M}} \right] e.$
